I have had my car written off and need to replace it with a [used BMW 3 Series](#) as soon as possible. I was the proud owner of a BMW back in 2001 and I always felt comfortable driving that car due to the safety features and the quality German engineering. My husband wanted me to have a cheaper car but it never drove as well as this and I just want to get back behind the wheel of a used BMW 3 Series Touring. I finish work early today and will drive to Big Motoring World to see what deals they can do and what deposit I would need for my car finance application.
